ABOUT ME

Systems Technician with expertise in software development, SQL databases, C# and Python, and experience in a range of technologies including development, automation, AI and Agents development. I am known for my ability to learn quickly, my adaptability, my teamwork skills and my focus on developing technological solutions. I also have an advanced level of English.

SKILLS

- Full Stack Programming (C#, Python, JavaScript)
- Version control with Git / GitHub
- Database creation and management (SQL)
- Teamwork
- Effective communication
- Troubleshooting

LANGUAGES

- Spanish
- English (B2 Advanced)

EXPERIENCE

Technology Apprentice *April-October 2026*

Summa SCI

- During my time at the company, I developed technological solutions for the Process Transformation team, including applications and automations using Python and Power Automate. These developments were complemented by agent integrations using on-premises AI models or those developed in Copilot Studio.
